\$34.50

The Last Ménage 12"x12" Print

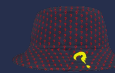

\$69

Towel

\$69

The Questionmark Bucket Hat

\$34.50

The Questionmark Pouch

\$9.69

PREEMPT THE INEVITABLE!

THE LAST MÉNAGE PROMOTION CAN END AT ANY TIME and ITS PRICES ARE SUBJECT TO CHANGE.

Due to **FREQUENT & ABRUPT FLUCTUATIONS** in the cost of manufacturing,

building materials and transit — we have developed a prototype for dynamic pricing and though we dread its implementation, if we're jerked around much longer — we'll do whatever's necessary to keep *The Last Ménage* coming! **ORDER NOW!** and **PROMOTE OUR BRAND!**

The Last Ménage Threeway Stereo Chorus

For a litany of reasons, the Threeway has been out of production. The Last Ménage is both its comeback and potential retirement. RT ElecTRonix will build The Last Ménage as long as we can, but to say the future is uncertain is worse than just hackneyed: it's the truth.

Order now!

Threeway Stereo Chorus

An authentic replica of a specific 1980s BBD rack chorus that haunts the market with vintage unobtainium — now reborn in compact form, with Tap Tempo and a few carefully chosen updates.

The Threeway Stereo Chorus features three distinct chorus voices, each powered by its own bucket-brigade device. Their interaction creates the impossibly thick, liquid modulation that defined an era of guitar playing.

Whether shimmering in stereo or gently warbling a clean signal, it's the sound of *too much, but just right*.

A faithful recreation of the original circuit, the Threeway can operate in *Preset*, *Manual*, or *Hybrid* mode (both active at once). Tap Tempo interacts with the Tempo X switch for real-time control, while the added Mix knob blends dry and wet signal for finer texture.

RT ElecTRonix gained access to a prime example of the triple-voice rack unit and documented its every nuance before re-engineering it to be quieter, clearer, and small enough to fit in a standard pedal enclosure. The result is everything the original promised — but much smaller and (relatively) more economical.

Ménage à Un - 1 / 4 Exclusive Prototypes

Prototype Preview Edition - Ships Late 2026

Available only as a **pre-order for one of four limited prototypes**, the *Ménage à Un* is reserved for the *Unicorn* and *Double Trouble* Offerings.^f

With the Threeway facing extinction, we don't give up: we innovate.

The *Ménage à Un* is our concept for the future of chorus. It's a simplified (yet feature-packed) evolution of the Threeway with a modular and linkable topology.

3 BBD chorus voices is divine... What about 4? What about 124 phase-synchronized analog chorus voices?

The *Ménage à Un* stands alone as a single voice mono chorus, has 3 stereo modes, and is expandable *ad infinitum* for surround sound, immersive and spatial audio.

Once an offering is claimed, we will finalize the design^g and build the prototype run throughout the coming year, with shipment planned for late 2026.

^f - The *Ménage à Un* prototype can only be prototyped and manufactured with the purchase of a *Unicorn* or *Double Trouble* offering so pledge now!

^g - RT ElecTRonix will welcome limited feedback from *Unicorn* and *Double Trouble* customers during the design phase. While all input will be reviewed, final design choices rest with RT ElecTRonix, and some suggestions may not be feasible, cost-effective or compatible with the project vision.
